

MASTERLIBRARY FEATURES & BENEFITS

Systems Contractors/Subcontractors

BUILDING OWNERS & FACILITY MANAGERS
ARCHITECTS, ENGINEERS & CONSULTANTS
CONSTRUCTION MANAGERS & GENERAL CONTRACTORS
SYSTEMS CONTRACTORS & SUBCONTRACTORS

plan design build manage

The MasterLibrary system provides value to everyone involved in any of the four primary aspects of the life of a facility—plan, design, build and manage.

BENEFITS

*Increase productivity,
decrease expenses and
improve collaboration on
your next building project.*

In addition to many project, process and organizational benefits, Systems Contractors and Subcontractors using the MasterLibrary system regularly will also:

- Gain strategic organizational value and operational efficiencies.
- Facilitate Submittal preparation process with easy-to-spec Product Information Pages (PIPs) and ability to copy and reposition electronic binders for similar projects.
- Reduce hardcopy prints, associated expenses and environmental footprint (Green Leadership in Energy and Environmental Design [LEEDs]).
- Improve response times.
- Reduce shipping costs.
- Improve operations with document and interaction tracking.
- Reduce possible risk of liabilities.
- Reduce potential for post-construction litigation and liability.

FEATURES

MasterLibrary's Product Information Pages (PIPs) across all Construction Specifications Institute (CSI) categories allow sharing of critical product specs, drawings and supporting manufacturer documentation to facilitate quick, easy retrieval of information needed during a building's or project's lifetime.

The MasterLibrary system's Submittal and As-Built Management modules include the following toolsets developed specifically for Systems Contractors and Subcontractors:

- Submittal tools using Product Information Pages (PIPs) and including a PDF generator for material lists with automatic Table of Contents
- As BUILTs

These tools and PIPs also allow fast, easy creation of integrated:

- Field Orders
- Requests for Proposals
- Proposals
- Change Orders

The MasterLibrary system seamlessly integrates with electronic data generated from existing application software used by facility professionals including:

- Proposals, Request For Quotes (RFQs) & Request For Information (RFIs)
- Schematic diagrams
- Email and other correspondence
- CAD drawings
- Meeting notes, memos
