

MLBinders™

Electronic Facility Records

The secure way to organize, access and collaborate with your facility records.

ML Binders provides secure, electronic storage and organization of all your district facility documents and drawings. Easily access and share the latest versions of your floorplans or system drawings. Quickly locate the information you and your staff need to do any job, all at your fingertips. Search less, work more.

ORGANIZE

- Eliminate filing cabinets with cloud storage
- Catalog all facility documents and organize them in a customizable folder structure
- Supports zipped files so you can transfer entire folders and subfolders without disorganizing the contents

SEARCH

- Search function and tagging makes it easy to locate your docs and files
- Generate QR codes for rooms or cabinets for instant access to data and drawings
- Access visual floorplans to make it easier to locate systems and assets without physically searching for them.

SECURE

- Authenticated, password protected platform provides more security than paper storage
- Build and control user roles, access levels and permissions for your staff

COLLABORATE

- Version control with secure, permanent web links to share your most up to date floorplans and drawings with local first responders and 3rd party contractors
- Receive notifications when a Binder is updated
- Mobile friendly access helps your team work smarter, wherever they are
- Connect to our professional services team to request updates to your system drawings

INTEGRATE

- Seamless integration with ML Work Orders to submit and track work requests and access important asset information
- Integrates with ML Drawings to store facility system drawings that are created and contain linked assets
